Remington-Gordonsville 230 kV/115 kV Electric Transmission Line Project Update

At Dominion Energy, we take our responsibility to deliver safe and reliable electricity seriously. Over the last year, we have been preparing for construction on the Remington-Gordonsville 115 kilovolt (kV) electric transmission line. We have been very active in the area already, and we have appreciated your patience and understanding.

We are now ready to move into active construction. This includes building construction entrances and access roads for heavy equipment to reach each structure location, and dismantling existing structures and erecting new structures. In order to maintain reliability throughout construction, our plan is to segment the work along the 38-mile corridor into six phases. Please see the enclosed map for details.

Before we begin each phase, we plan to host construction informational sessions for the community to learn more about the construction activities. We hope you can join us for one of these sessions. Property owners along phase 1 were sent an invitation a few weeks ago. The phase 1 session is scheduled for:

Tuesday, July 17, 2018
5-7 p.m.
Town of Orange Public Works Department Building
Community Room
235 Warren St.
Orange, VA 22960

On Aug. 29, 2017, we received approval from the Virginia State Corporation Commission (SCC) to rebuild this line. The SCC found that the project is needed and our solution reasonably minimizes adverse effects. The project includes rebuilding the single-circuit 115 kV structures within the corridor as a double-circuit 230 kV/115 kV transmission line. The project is approved using weathering steel monopoles on a 100-foot wide right of way, with the flexibility to implement shorter H-frame structures where feasible on a 140-foot wide right of way. We are working toward implementing the shorter H-frame structures on a 4.5-mile segment in the Rapidan area of Orange County along Clark Mountain.

We look forward to completing this project in a courteous and respectful manner. We will continue to provide updates. For additional project details, including maps with construction access points, please visit our website at www.DominionEnergy.com/remingtongordonsville. You may also contact us by sending an email to powerline@dominionenergy.com or calling 888-291-0190.
