Hathaway to Rocky Mount 230 kV Electric Transmission Line Rebuild Project

Dear Neighbor:

At Dominion Energy, we are committed to providing safe and reliable electric service in the communities we serve. You are receiving this letter because we are preparing to rebuild approximately 3.9 miles of an aging 230 kilovolt (kV) double-circuit electric transmission line between our Hathaway Substation in Nash County, North Carolina and the Duke Energy Progress connection point in Rocky Mount, North Carolina.

After six decades of dependable service, the existing structures and related components are at the end of their service life and need to be replaced. This double-circuit line was originally built primarily on weathering steel lattice structures. The new structures will be similar in height and constructed primarily of galvanized steel monopoles. No new right of way is needed. This project will meet current electric standards and maintain service reliability for years to come for all our customers.

Preconstruction activities will begin in July, which includes preparing access roads, managing vegetation in the right of way, and laying wooden matting to protect vegetation. Our construction will occur in phases.

- Phase I will last from September 2023 to December 2023 and will occur between Hathaway and Nash substations.
- Phase II will last from March 2024 to June 2024 and will occur between Nash Substation to the Duke Energy Progress connection point.
- Area restoration will occur in summer and fall 2024. This schedule is subject to change.

Your electric service is not expected to be interrupted as a result of this project. Thank you for your patience and understanding while we work in your neighborhood.

Sincerely,

The Electric Transmission Project Team

Hathaway to Rocky Mount 230 kV Electric Transmission Rebuild Project

Quick Facts:

- Approximately 3.9-mile rebuild
- Uses existing right of way
- New structures will be galvanized steel double-circuit monopoles
- Project Schedule:
 - **Summer 2023:** Preconstruction activities
 - **September – December 2023:** Phase 1 from Hathaway to Nash
 - **March – June 2024:** Phase 2 from Nash to Rocky Mount (work end point)
