South Hill 230 kV Transmission Line – Phase 3 Update

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. You are receiving this postcard to update you on work happening between our Tunstall and Evans Creek substations.

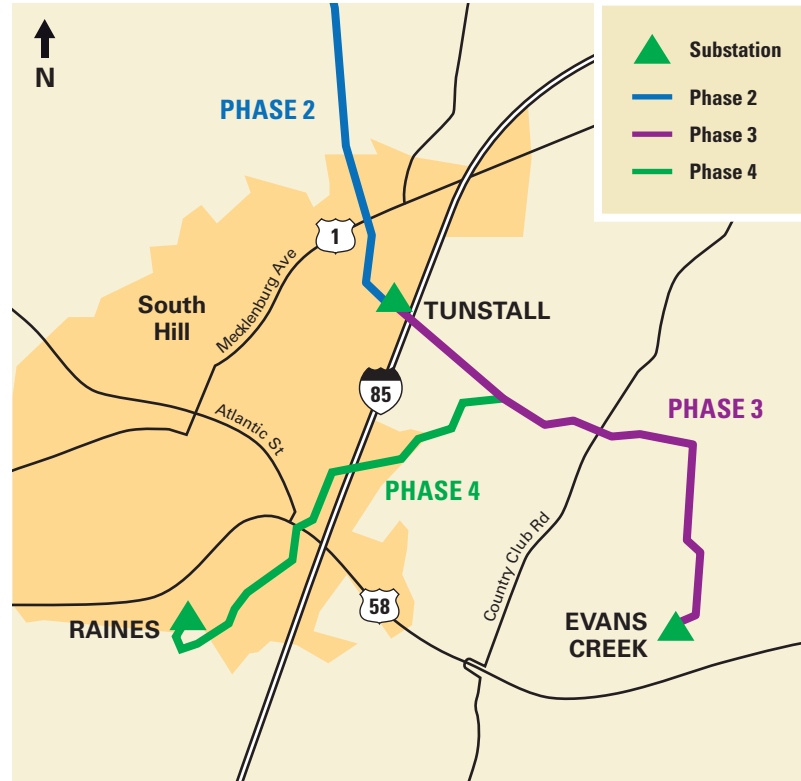

Preconstruction activities for Phase 3 are expected to begin in mid-March 2025, and construction is scheduled to start mid-summer 2025. During this timeframe, you may notice our contractors in and around the right of way installing construction entrances and delivering equipment. These construction entrances should not impact local roadways. Our forestry team will clear trees within the right of way corridor. They will also remove and trim trees outside the right of way corridor that could be a danger to the transmission line.

We are dedicated to working safely and courteously in your community. Thank you for your patience and understanding as we work to power your every day.
