Staunton-Craigsville 115kv Electric Transmission Line Rebuild

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. You are receiving this postcard because we would like to provide an update on the Staunton to Craigsville 115 kilovolt (kV) Electric Transmission Line Rebuild Project.

MORE

This project rebuilt approximately 4.6 miles of the electric transmission line between Staunton Substation and Trimbles Mill in Augusta County, Virginia. In spring 2023, we completed construction on this section of transmission line. New H-Frame structures and equipment were installed to help maintain reliable electric service in your area.

Construction on the remainder of the line, from Trimbles Mill to Craigsville Substation, was originally expected to begin in early 2024. We now tentatively plan to begin construction on this phase of the project in Fall 2027.

The decision to reschedule this project will not impact the quality of your electric service, and the existing infrastructure remains safe and secure. We will continue to update you on the project as it progresses.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

PROJECT TIMELINE

- PHASE 1 AND PHASE 2**
Staunton Substation to Trimbles Mill
(Completed spring 2023)
- PHASE 3**
Trimbles Mill and Craigsville
(Tentatively begins fall 2027)
