Tarboro to Hathaway 230 kV and Partial 115 kV Electric Transmission Line Rebuild Project

AT DOMINION ENERGY, we are dedicated to finding the best solution for your long-term energy needs in the communities we serve. You are receiving this postcard to update you on our construction progress on the Tarboro to Hathaway 230 Kilovolt (kV) and Partial 115 kV Electric Transmission Line Rebuild Project. In late summer 2022, we began rebuilding approximately 17 miles of the existing transmission line between our Tarboro and Hathaway substations. This work is necessary to maintain service reliability for our customers in Edgecombe County, North Carolina.

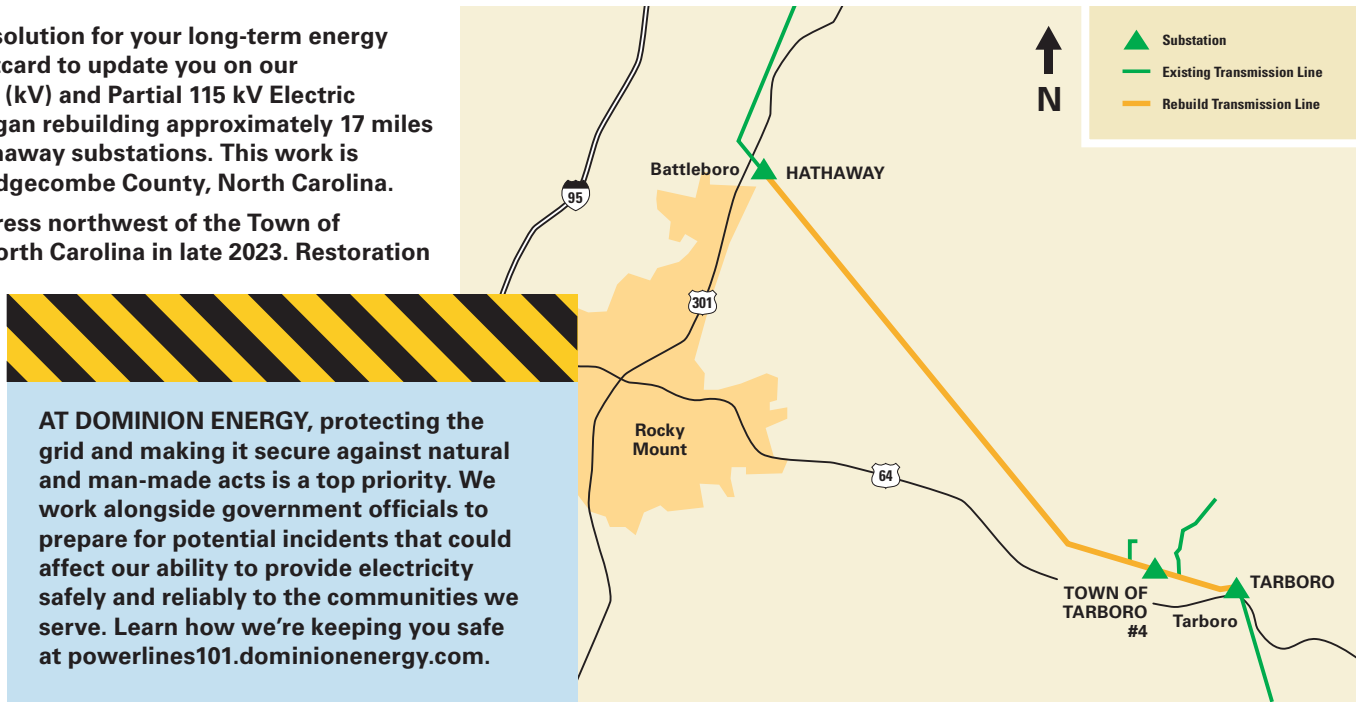

In February 2023, construction activities are scheduled to progress northwest of the Town of Tarboro. Construction will end in Hathaway near Battleboro, North Carolina in late 2023. Restoration activities will occur through summer 2024.

Please maintain a safe distance from construction sites for your protection. This allows our crews to continue working safely.

Your electric service is not expected to be interrupted as a result of this project. We are committed to working safely and courteously in your neighborhood and will restore the right of way once work is complete. As the project progresses, additional updates will be provided.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve.
