## Tarboro to Hathaway 230 kV and Partial 115 kV Electric Transmission Line Rebuild Project

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers our customers every day. You are receiving this postcard to update you on this project. We have completed rebuilding approximately 17 miles of the

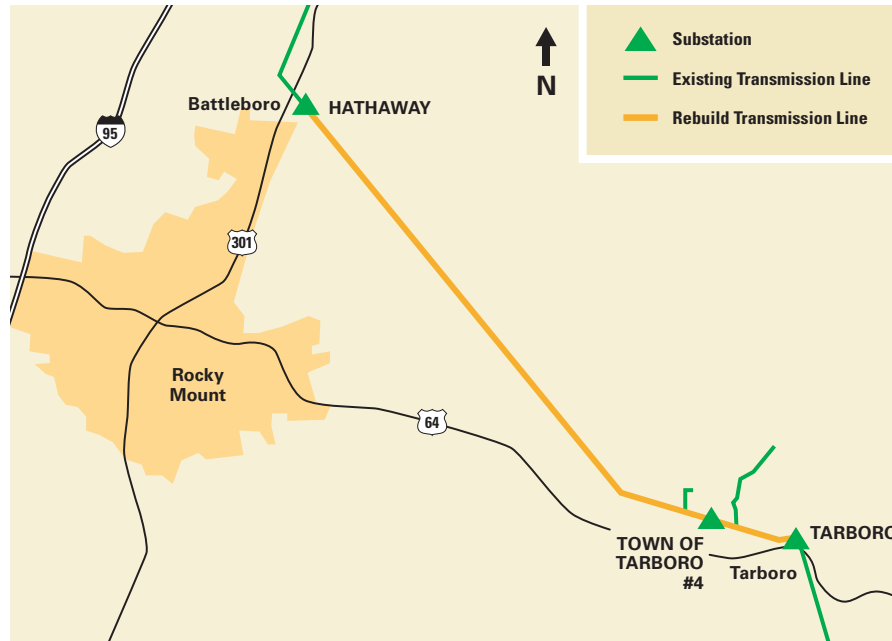

existing 230 kilovolt (kV) transmission line between our Tarboro and Hathaway substations in Edgecombe County, North Carolina. This project also included a partial rebuild of an existing 115 kV electric transmission line in the same corridor. This new infrastructure will ensure the continued safety and reliability of the electric grid.

MORE

Between summer 2022 and fall 2023, we replaced aging transmission infrastructure with upgraded equipment. The new electric transmission structures will require less maintenance over time and have a longer service life.

This winter, crews will remove construction equipment, materials, and access matting. You may periodically notice crews restoring the right of way to its pre-existing condition through spring. Thank you for your patience while we rehabilitate vegetation. You can learn about how we maintain a safe right of way at [DominionEnergy.com/RightOfWay](https://DominionEnergy.com/RightOfWay).

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).

## RESTORATION ACTIVITIES

LATE FALL 2023

Construction completed  
and right of way restoration  
in progress

LATE SPRING 2024

Rehabilitation completed  
(anticipated)
