Tunis-Boykins 115 kV Transmission Line Rebuild Project

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. To replace aging equipment and maintain reliable service for our customers, we are rebuilding an existing 115 kilovolt (kV) electric transmission line. The line starts at our Tunis Substation near Winton, North Carolina, continues through Murphy Substation in Murfreesboro, North Carolina, and ends at Boykins Substation in Boykins, Virginia.

Phase 1 construction is scheduled from January 2025 through September 2025. Phase 2 is expected to last from August 2025 through August 2026. Phase 3 is expected from October 2025 through April 2027.

To learn more about this upcoming work, we invite you to join us for a virtual community meeting. Our project team will be available during this time to answer your questions about construction.

We are dedicated to working safely and courteously in your community. Thank you for your patience while we complete this important reliability project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
