Waller – Lightfoot – Skiffes Creek 230 kV Electric Transmission Line Rebuild Project

Dear Neighbor:

At Dominion Energy, we are dedicated to finding the best solution for our long-term energy needs in the communities we serve. You are receiving this letter to update you on our construction progress on the Waller – Lightfoot – Skiffes Creek 230 kilovolt (kV) Electric Transmission Line Rebuild Project in Williamsburg, York County, and James City County, Virginia. As a reminder, we are in the process of rebuilding approximately 13 miles of the existing transmission line between our Skiffes Creek, Waller, and Lightfoot substations in the same right of way with new single-circuit and double-circuit weathering steel H-frame structures. This work is necessary to maintain service reliability for our customers.

In January, we are scheduled to begin construction between our Waller and Lightfoot substations. Throughout the next month, you may notice our crews or contractors accessing properties along the right of way corridor to survey the property. Other preconstruction activities include clearing trees and brush around the right of way, building access roads, and protecting existing vegetation with wooden mats. Construction between our Waller and Lightfoot substations is scheduled to end in summer 2023.

Work continues between our Skiffes Creek and Waller substations into spring 2023. Restoration activities on both sections are scheduled for 2023 and 2024.

Please maintain a safe distance from construction sites for your protection. This allows our crews to continue working safely.

Your electric service is not expected to be interrupted as a result of this project. We are committed to working safely and courteously in your neighborhood and will restore the right of way once work is complete. As the project progresses, additional updates will be provided.

For more information about this project, visit [DominionEnergy.com/Waller](https://www.dominionenergy.com/Waller). For more information about our construction process, visit our website at [powerlines101.dominionenergy.com](https://www.powerlines101.dominionenergy.com).

We are working to minimize the impact of this important project. Thank you for your patience and understanding. For questions or concerns, please contact us by calling 888-291-0190 or by sending an email to powerline@dominionenergy.com.

Sincerely,

The Electric Transmission Project Team

Waller – Lightfoot – Skiffes Creek 230 kV Electric Transmission Line Rebuild Project

Quick Facts:

- Approximately 13-mile rebuild
- Uses existing right of way
- New structures will look similar to and be located near the existing structures
- Construction will occur in two sections
 - Between Skiffes Creek and Waller from summer 2022 to spring 2023
 - Between Waller and Lightfoot from winter 2022/2023 to summer 2023
 - Restoration activities will occur in 2023 and 2024
