

Yadkin-Fentress 500 kV Electric Transmission Project City of Chesapeake, Virginia

This project will rebuild an existing line (#588) and will build a new line (#5005.) This work will maintain system reliability and successfully integrate Coastal Virginia Offshore Wind (CVOW) with the current transmission system.

Project Fast Facts:

- 13.5 miles between Yadkin and Fentress substations.
- No new right of way planned.*
**Pending easements on 1.6-mile Constraint Design Segment (235 feet wide)*
- The existing lattice tower structures with one 500 kV line will be replaced by 2 dull galvanized monopole structures with two 500 kV lines.
- New monopoles will be an average of 186 feet tall, which is 71 feet taller than the existing structures.
- Where possible, new poles will be placed in similar locations as the existing structures.

Yadkin-Fentress 500 kV Electric Transmission Project City of Chesapeake, Virginia

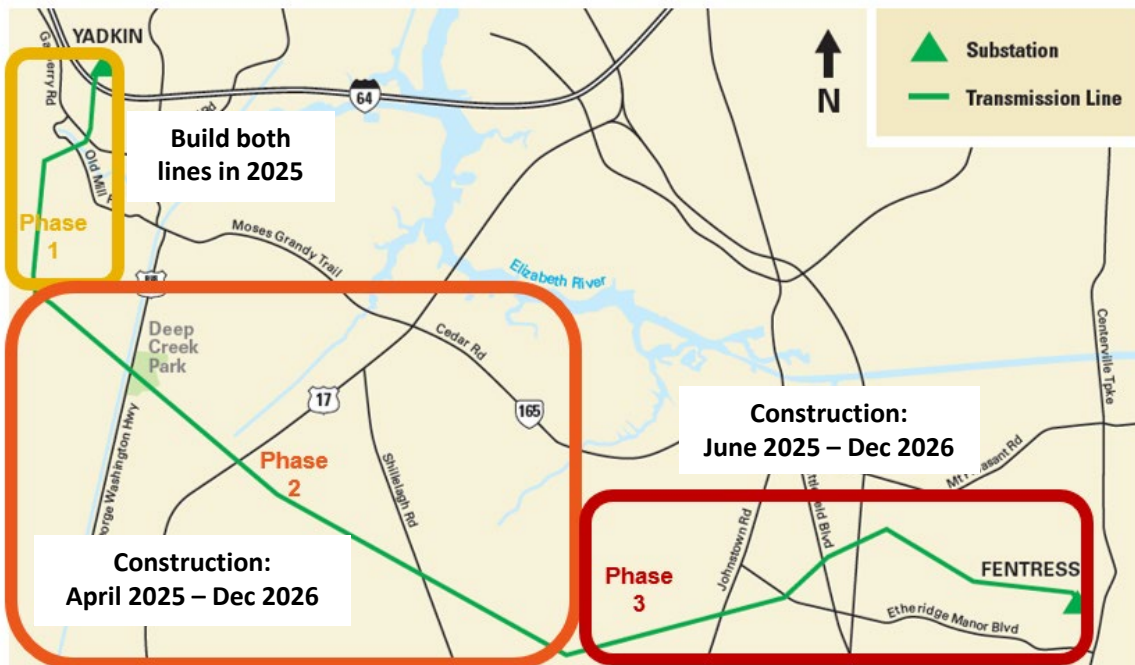

This project will rebuild an existing line (#588) and will build a new line (#5005.) This work will maintain system reliability and successfully integrate Coastal Virginia Offshore Wind (CVOW) with the current transmission system.

Project Timeline:

- Phase 1 will be completed in 2025, except for a few structures at I-64/Yadkin Substation in 2026.
- Phases 2 and 3 will begin in spring and summer 2025, starting from Yadkin Substation and working towards Fentress Substation.
- Line #588 will be rebuilt by June 2026. Crews will then double-back to finish building Line #5005 in Phases 2 and 3 by December 2026.

Schedule is subject to change pending final approvals, permits, weather, and progress.
