Yadkin-Fentress 500 kV Electric Transmission Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. As announced and filed with the Virginia State Corporation Commission (SCC) in 2024, we are planning to replace 13.5 miles of an existing 500 kilovolt (kV) transmission line with two 500 kV lines between our Yadkin and Fentress substations in the City of Chesapeake, Virginia. We anticipate receiving a Final Order from the SCC early this year, and plan to begin construction activities in March. Work will begin at Yadkin Substation and progress toward Fentress Substation. We expect to finish construction by late 2026. In 2026, we will also rebuild three transmission structures near Yadkin Substation and I-64. This schedule is subject to change, pending final permits, weather, and progress.

We invite you to learn more about the Yadkin-Fentress 500 kV Electric Transmission Project at our Preconstruction Community Meetings. We will host a virtual meeting on Tuesday, February 11, and an in-person meeting on Wednesday, February 12. These meetings will give you the opportunity to speak with project team members and ask them detailed questions about what to expect during construction.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
