

## Discover the Potential of Renewable Natural Gas

### The Renewable Natural Gas (RNG) Difference

Capturing waste methane from farms, landfills, food waste and other sources, RNG is the cleanest energy source because it removes more greenhouse gases from the atmosphere than it releases when consumers use the gas. It's better than zero-carbon. It's carbon-beneficial! In 10 years, our current RNG commitments will remove greenhouse gasses equivalent to taking 1.2 million cars off the road, every year. But we are just getting started. We've built a new custom web experience to bring even more potential to make a difference.

### For potential partners

We co-founded the two largest Renewable Natural Gas (RNG) programs in the country with partners like Smithfield Foods, Vanguard Renewables and the Dairy Farmers of America. But agriculture is just one industry where we can make a difference. We are seeking partnerships with landfill, food and wastewater operators to bring the reliable, renewable, carbon-eating power of RNG to more communities. Learn more at [DominionEnergy.com/RNGnow](https://DominionEnergy.com/RNGnow).

### For potential suppliers

Making renewable natural gas won't matter if it can't reach our communities. We are actively courting suppliers to interconnect with our Dominion Energy Local Distribution Companies to accept RNG. Our new website features information and tools specifically curated for potential suppliers, from details on our award-winning commitment to safety to standard interconnect scoping considerations, you can start your journey at [DominionEnergy.com/RNGnow](https://DominionEnergy.com/RNGnow).

### For potential consumers

Customer preference for natural gas to heat homes and cook food is well documented. Renewable natural gas empowers customers to embrace that preference with the peace of mind their RNG-powered home is making a difference for a cleaner planet. In Utah, our GreenTherm program empowers customers with an affordable way to reduce methane emissions by voluntarily purchasing RNG. Learn how consumers can opt in at our rebuilt site.
