

# Nationwide Renewables

## Western US

- ▲ Hydroelectric in operation: 318 MW
- ▲ Biomass in operation: Up to 273 MW
- Wind in operation or under development: 2,612 MW
- Kitty Hawk Microgrid: .02 MW
- Solar in operation or under development: 5,354 MW
- Solar plus storage in operation or under development: 243 MW solar, 125 MW storage
- Stand-alone storage in operation or under development: 44 MW

## Eastern US

*Note:*

Megawatt totals also reflect power purchase agreements executed with Dominion Energy Virginia and Dominion Energy North Carolina.

Kitty Hawk Microgrid's MW capacity shown does not include the onsite battery storage.

Solar capacity included in total but not reflected on map.

- 45 MW of solar distributed generation (DG) in Virginia in operation or under development reflected on separate DG map.

Stand-alone storage capacity included in total but not reflected on map.

- 4 MW of stand-alone storage in Virginia in operation or under development listed on separate DG map.
