

Fleet Electrification

Dominion Energy is making it easier and more affordable to **charge your fleet.**

Smart

Guides, interactive tools, calculators, programs and **incentives** to support fleet electrification

Convenient

Monthly on-bill payments reduce upfront costs for EV charging infrastructure

Equitable

Charging infrastructure available to eligible fleets in disadvantaged communities at no cost

Flexible

EV charging hardware and software options to meet specific customer needs

What are the benefits of fleet electrification?

Transitioning your fleet to electric vehicles can reduce fuel and maintenance costs, improve air quality, and reduce carbon impacts. Operating a green fleet is also a visible sign of your commitment to sustainability.

What types of solutions are available for fleet customers?

- Interactive tools and advisory support for vehicles and charging
- Fleet Charging Program that provides turn-key EV charging infrastructure installation and maintenance

What incentives are available?

Customers participating in the Fleet Charging Program receive a **50% upfront incentive** on EV charging construction and installation, commonly referred to as “make-ready.” Customers make convenient, monthly on-bill payments for the remaining costs. There may also be grants and tax incentives available.

How can I get started?

Visit [DominionEnergy.com/EV](https://www.dominionenergy.com/EV) to learn more. Submit an interest form on our website to have one of our EV experts contact you directly.

Actions Speak Louder
