

Schedule NRP
NON-RESIDENTIAL PRESCRIPTIVE PROGRAM

I. PURPOSE

The purpose of this Program is to provide non-residential customers incentives for the installation of a variety of energy saving measures, including Refrigeration Evaporator Fans (Reach-in and Walk-in Coolers and Freezers), Commercial ENERGY STAR Appliances, Commercial Refrigeration, Commercial Ice Maker (ENERGY STAR), Advanced Power Strip, Cooler/Freezer Strip Curtain, HVAC Tune Up, Vending Machine Controls, Kitchen Fan Variable Speed Drives (“VSD”) and Commercial Duct Test and Seal.

II. AVAILABILITY

The Program provides non-residential customers with an incentive to install various energy efficiency measures:

- Refrigeration Evaporator Fans
- Commercial ENERGY STAR Appliances
- Commercial Refrigeration
- Commercial ENERGY STAR Ice Maker
- Advanced Power Strip
- Cooler/Freezer Strip Curtain
- HVAC Tune-Up
- Vending Machine Controls
- Kitchen Fans VSDs
- Commercial Duct Testing and Sealing

This Program is available to non-residential customers (customers in the Commercial, Public Authority, and Industrial classes) in the Company’s North Carolina service territory. Participation in this Program is strictly voluntary. Customers who elect to opt out of the DSM/EE Riders, as provided for in N.C.G.S. 62-133.9(f), cannot participate in this Program.

An energy efficiency measure incentive is not available under this Program if the customer has previously received such an incentive for the same installation on the same unit in another Dominion Energy North Carolina energy efficiency program.

Schedule NRP
NON-RESIDENTIAL PRESCRIPTIVE PROGRAM

(Continued)

The Company will market the Program through a network of licensed contractors. The Program requires the work be completed by a licensed contractor who has registered with the Company's implementation vendor as part of the Program's vendor network. The Company, via its implementation vendor, will enroll contractors in the vendor network. A list of contractors enrolled in the vendor network will be provided on the Company's and the implementation vendor's websites.

III. INCENTIVE PAYMENTS

As modeled, the Program pays an average incentive of \$10,091. The average incentive will vary depending on the specific measures installed. The Program will offer customers the opportunity to select their preference to reduce the cost of the energy conservation improvement project by assigning the rebate to the contractor or directly receiving the rebate themselves.

Rebate applications must be submitted within 45 days of the service date. Upon receipt of a completed rebate application, Dominion Energy North Carolina will process the completed application, confirm or inspect the installation, and forward the incentive payment to the customer within 90 days, unless the customer requests the payment go to the contractor. The Company reserves the right to withhold any rebate payment until the customer has satisfactorily completed the application process. Dominion Energy North Carolina and/or its designees including program administrators and evaluation contractors reserve the right to review installations to verify completion and measure energy savings to ensure compliance with all program requirements. Such reviews will be made at a time convenient to the applicant.
