

RIDER GP  
NC GREENPOWER PROGRAM

---

I. APPLICABILITY & AVAILABILITY

This Rider is available on a voluntary basis, in conjunction with any of the Company's Rate Schedules for the purchase of a Renewable Energy Certificate produced from Renewable Resources provided through the state-wide NC GreenPower program ([www.ncgreenpower.org](http://www.ncgreenpower.org)).

This Rider is not applicable to Customers receiving temporary service.

II. DEFINITIONS

Renewable Resources:

For purposes of this tariff, Renewable Resources are those renewable resources included in the NC GreenPower program that are used to generate electricity to be placed on the electric grid in North Carolina and include solar energy, wind power, small-scale hydro power, and biomass energy generation.

Renewable Energy Certificate ("REC"):

A REC purchased through the NC GreenPower Program represents the environmental attributes associated with the generation of 1,000 kilowatt-hours ("kWh") of electricity from a Renewable Resource.

Rider GP Block:

A Rider GP Block is a unit representing the environmental attributes from 125 kWh of electricity generated from a Renewable Resource. Eight Rider GP Blocks would represent 1,000 kWh, or 1 REC.

III. MONTHLY RATE

In addition to all other charges of the Rate Schedule with which this Rider is used, the following charge shall also apply to each Rider GP Block the Customer purchases ("Contribution"):

\$4.00 per Rider GP Block

Each \$4.00 Contribution will purchase one Rider GP Block from a Renewable Resource. The balance of the Contribution will support solar installation packages at North Carolina kindergarten through twelfth grade (K-12) schools (Solar+ Schools program). This Rider's monthly rate shall be billed to the Customer regardless of the Customer's actual monthly kilowatt-hour consumption.

While taking service under this Rider, the Customer can change the number of Rider GP Blocks purchased once during any consecutive twelve-month period unless otherwise authorized by the Company.

RIDER GP  
NC GREENPOWER PROGRAM

---

IV. MODIFICATION OF RATES AND OTHER PROVISIONS HEREUNDER

The provisions of this Rider, including the rates for the purchase of a Rider GP Block, are subject to modification at any time in the manner prescribed by law, and when so modified, shall supersede the rates and provisions hereof.

The actual amount of electricity provided by Renewable Resources under this Rider to the state-wide electric grid in North Carolina during any specific month may vary from the number of Rider GP Blocks that Customers have purchased. The electricity purchased or produced from the Renewable Resources may not be specifically delivered to the Customer, but will displace electricity that otherwise would have been produced from traditional generating facilities for delivery to the Company's Customers within the State of North Carolina.

V. TERM OF CONTRACT

The term of contract shall be such as may be mutually agreed upon but for not less than one year. After the initial period, the Customer or the Company may terminate service under this Rider by giving the other party at least thirty (30) days prior written notice. Notwithstanding the above, the Company reserves the right to terminate service under this Rider upon thirty (30) days prior written notice if the retail supply of electric generation is deregulated, the Company's participation in the statewide NC GreenPower program is terminated, the statewide NC GreenPower program is terminated, or other legislative action supersedes this Rider and/or the NC GreenPower program.
