

# Outdoor Lighting Solutions

Dominion Energy can help you choose from a variety of lighting options to meet your needs. We offer products for use on streets, parking lots, neighborhoods, and individual homes. Based on your preference, most of our light fixtures are available in LED, high pressure sodium, or metal halide versions. Our lighting service, in addition to supplying the lighting fixtures and poles for the project, includes the design, installation and on-going maintenance. We look forward to helping you with your lighting needs.

## Program Benefits

- Turn-key design and installation process
- Photometric design assistance is available at no cost
- Any required fixture repair or maintenance is included
- Installations and repairs performed by trained Dominion Energy employees or contractors
- Multiple standard fixtures available to meet your needs
- Products are specified, reviewed, and tested for reliability and long product life

## LED Lighting Benefits

- 30-70 percent less energy consumption than current high intensity discharged lighting.
- Remote monitoring to report failures and issues.
- Increased visibility for drivers and pedestrians.
- Improved light uniformity with less shadows and hot spots.
- Superior color impacts (colors more vibrant).
- Lower light depreciation over life of fixture.
