		WEATHER NORM	LIZATION ADJUSTMENT	
		AP	PLICABILITY	
This W and 33 increas	/eat 3. Tł sed	ther Normalization Adjustment (WNA) is applicable he commodity charges per therm for each custom or decreased in an amount to the nearest one-thou	to and is a part of the Company's firm gas rate schedules 31, 32V, 32S er account during the billing months of November through April will be sandth of a cent, as derived by the following formula:	
		WNA = <u>WSL x R</u> ATH - BTH		
		Where: WSL = <u>ATH - BT</u> ADD	H X (NDD - ADD)	
WNA	=	Weather Normalization Adjustment factor for a part	rticular account expressed in dollars per therm.	
WSL	=	: Weather Sensitive Load which is the difference in the amount of therms that would have been consumed by the customer during normal weather and the amount of therms actually consumed.		
R	=	Approved rate less cost of gas for applicable rate schedule determined as follows:		
		Rate 32V	Rate 32S	
		R= \$0.58932	R= \$0.64932	
		Rate 31	Rate 33	
		R= \$0.53476	R= \$0.48476	
		Actual therms consumed by customer during curry	ant billing period	
ATH BTH	=	Base load therms which is the average of the the	erms consumed by customer during the previous billing months of June	
ATH BTH	=	Base load therms which is the average of the the July and August. If BTH is greater than ATH, then base load therms will be as follows:	erms consumed by customer during the previous billing months of June BTH will equal to ATH. If base load therms cannot be determined, the	
АТН ВТН	=	Base load therms which is the average of the the July and August. If BTH is greater than ATH, then base load therms will be as follows: Rate 32V = 18 therms Rate 31 = 19 therms	erms consumed by customer during the previous billing months of June BTH will equal to ATH. If base load therms cannot be determined, the Rate 32S = 4 therms Rate 33 = 739 therms	
ATH BTH NDD	=	Base load therms which is the average of the the July and August. If BTH is greater than ATH, then base load therms will be as follows: Rate 32V = 18 therms Rate 31 = 19 therms Normal heating degree days during customer's bill	erms consumed by customer during the previous billing months of June BTH will equal to ATH. If base load therms cannot be determined, the Rate 32S = 4 therms Rate 33 = 739 therms ing period authorized by the Commission.	

Effective For Bills Rendered On and After the 1st Billing Cycle of November 2022 Pursuant to Order No. 2022-686, Docket No. 2022-6-G
