

EnergyWise for Your Business

Solutions and Incentives
for Municipalities

Actions Speak Louder

Cutting unnecessary spending is something everyone can support. And that's just one reason why saving energy and money makes so much sense for local governments. Efficient energy use can also help improve profitability, reduce greenhouse gas emissions and boost cost efficiencies across the board.

EnergyWise for Your Business offers a range of solutions and incentives to move you toward greater energy efficiency. Whether you're constructing a new building, conducting major renovations, retrofitting inefficient equipment or purchasing new equipment, we're here to help.

Eligible equipment may include:

- Interior/exterior lighting
- HVAC systems and equipment
- Building controls and energy management systems

Contact us today to get started.

**Energy Information Administration (EIA), Commercial Buildings Energy Consumption Table E5, 2012

Some Facts About Energy Use in Municipalities

- Government agencies spend more than \$10 billion a year on energy—with nearly one-third of that energy going to waste.* Local governments are already managing tight budgets while aiming to provide quality public services and meet constituent needs, making energy efficiency a simple solution for bottom-line improvements and environmental leadership.
- Heating, ventilation and air conditioning account for about 36% of a municipal building's total electric use, with lighting making up another 17%.**
- For local governments, improving energy efficiency can limit wasteful overhead spending, create a more comfortable environment for employees and visitors, improve building and neighborhood safety, demonstrate environmental responsibility and potentially qualify for better municipal bond ratings and financing.

Typical Electric Usage in Local Governments

- HVAC
- Water Heating
- Lighting
- Cooking
- Refrigeration
- Office Equipment
- Other
 - Miscellaneous
 - Process Equipment
 - Motors
 - Air Compressors

EnergyWise for Your Business

Solutions and Incentives
for Municipalities

Actions Speak Louder

Using the prescriptive approach offers predetermined incentives for a wide selection of proven energy efficiency technologies.

Prescriptive Program

Exterior Lighting*		
LED High Mast Stadium Lamps	LED Pole Lights	LED Corn Cob Lamps
Interior Lighting*		
LED Replacement Lamps (Tubes)	LED Low-Bay/Troffer/Surface and Suspended Linear Fixtures	Lighting Controls
HVAC		
Split and Packaged HVAC Systems	Air-Cooled Chillers	Water-Cooled Chillers
Packaged Terminal Air Conditioner (PTAC)	Packaged Terminal Heat Pump (PTHP)	Air-Source Air Conditioner Air-Source Heat Pump

Custom Program

Round Signals, 8" and 12"	Turn Signals, 8" and 12"	Pedestrian Signals, 9", 12" and 16"
Variable-Speed Drive Pumping Improvements		

NOTE: Additional Prescriptive and Custom incentives (not listed above) are available. Please visit our website for further details.

**Lighting incentives are capped at 50% of total project cost.*

EnergyWise for Your Business incentives are limited, offered on a first-come, first-served basis and are subject to project and customer eligibility and funds availability. For each program year (Dec. 1 – Nov. 30), EnergyWise for Your Business incentive payments are capped per customer federal tax ID number at \$100,000 per project type. Project types include lighting, HVAC, food service and custom.

Most projects require pre-approval prior to purchasing and installation of equipment. Please check program requirements with the EnergyWise for Your Business team.

Available exclusively to eligible Dominion Energy South Carolina non-residential electric customers.
