

Completed Project: 61 West

Tobias, LLC partnered with Dominion Energy to install 6 Tesla Universal Charging Stations at 61 West, a medical complex looking to offer charging to employees and patients. With no upfront costs, the site host was able to immediately begin collecting revenue from the charging stations, while taking advantage of on-bill financing for the equipment, construction, and ongoing maintenance provided by Dominion Energy.

“Being able to provide EV charging for our employees and clients without having to put any money down upfront made this installation so easy. The peace of mind knowing that Dominion Energy will handle all maintenance is a huge advantage.”

- 61 West Site Host

Tesla Universal Charging Stations allow users to seamlessly switch between J-1772 and NACS plugs.
