

Ways to Save Tips

Conserving energy can help you reduce your energy bills. Here are “no-cost/low-cost” tips to help you get started:

- Turn off lights and unplug equipment when not in use
- Set thermostat to 68° in the winter and 78° in the summer. Strategically place fans to keep living areas comfortable
- Air dry clothes when possible
- When possible, use cold water to wash clothes or dishes
- Wash only full loads of dishes and clothes
- Keep the fridge between 36° and 39° degrees
- Lower water heater to between 120° and 125° degrees
- Select the air dry option instead of the dishwasher’s drying cycle
- Look for the ENERGY STAR® label on light bulbs, home appliances, electronics, and other products
- Turn heat or air conditioning off (or close registers) and close doors to unused rooms
