1. The historical figures reflect the actual resource mix of electricity delivered to Dominion Energy Green Power customers in 2019. The prospective figures reflect the renewables that we are contracted to provide for 2020. Actual 2020 figures may vary from the prospective 2020 figures according to resource availability. We will report the actual 2020 resource mix of the electricity you purchased in the form of the Historical Product Content Label before August 1, 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product may include generation from a facility that is approved under a strict set of criteria as repowered or a facility that is approved for extended use by Green-e Energy.

For comparison, the 2018 average mix of resources supplying Dominion Energy Virginia included: Natural Gas (39.2%), Nuclear (34.3%), Coal (17.4%), Pumped Storage (3.3%), Renewable (3%), Hydro (2%), and Oil (0.8%) [Dominion Energy Virginia, 2018 data].

The typical Dominion Energy Virginia customer uses 1,000 kWh per month [Dominion Energy Virginia, 2018 data].
