1. The historical figures reflect the actual resource mix of electricity delivered to Dominion Energy Green Power[®] customers in 2023. The prospective figures reflect the renewables that we are contracted to provide for 2024. Actual 2024 figures may vary from the prospective 2024 figures according to resource availability. We will report the actual 2024 resource mix of the electricity you purchased in the form of the Historical Product Content Label before August 1, 2025.

2. New Renewables come from generation facilities that first began commercial operations within the past 15 years. This product may include generation from a facility that is approved under a strict set of criteria as repowered or a facility that is approved for extended use by Green-e[®] Energy.

For comparison, the 2023 average mix of resources supplying Dominion Energy Virginia included: Coal (1%); Nuclear (30%); Gas (37%); Solar (3%); Biomass (1%); Pumped Storage (3%); Purchases (25%). [Dominion Energy Virginia, 2024].

The typical Dominion Energy Virginia customer uses 1,000 kWh per month. [Dominion Energy Virginia, 2024].
