

# Residential Charger Program

## Income Qualifying Option

Dominion Energy will supply and install a Level 2 EV charger at no cost for income qualifying customers.

## How it works

1

### Submit an interest form to verify your household income

Submit a Program Interest Form on our website at [DominionEnergy.com/EV](https://www.dominionenergy.com/EV) and let us know if you meet the income requirements listed below. A Dominion Energy representative will follow up about next steps.

2

### Complete a home charging assessment

To confirm eligibility, you will be asked to complete a charging assessment for your home. This will help us determine the best charging solution for you.

3

### Get your charger installed

If approved, one of our qualified, third party electricians will install your charger, including the necessary breaker, wiring, and outlet.

4

### Charge at home

Once your charger is installed, you can look forward to home charging that is quick, convenient, and affordable.

### One Stop Shop

Ditch the stress and let us handle each step of the installation process.

### Installation Incentive

Income qualifying customers can receive a Level 2 charger free of charge.

### Maintenance & Support

We will provide ongoing maintenance and support, including a five year warranty for your charger.

## Eligibility

- Be an existing residential customer in Virginia
- Own a free-standing single-family home
- Have capacity in your electrical panel to support required upgrades
- Select a charging location that is within a reasonable distance from your main electrical panel with a clear path between
- Install a Dominion Energy approved charger, included as part of this program
- Have a household income that doesn't exceed the following limits:

Size of Family Unit	1	2	3	4	5	6	7	8
Income Limit	\$63,700	\$72,800	\$81,900	\$90,950	\$98,250	\$105,550	\$112,800	\$120,100
