

Residential Charger Program

Dominion Energy will supply and install your Level 2 EV charger for around \$40 a month.

How it works

1

Submit a program interest form

Submit a Program Interest Form on our website at [DominionEnergy.com/EV](https://www.dominionenergy.com/EV). A Dominion Energy Representative will follow up about next steps.

2

Complete a home charging assessment

To confirm eligibility, you will be asked to complete a charging assessment for your home. This will help us determine the best charging solution for you.

3

Get your charger installed

If approved, one of our qualified, third party electricians will install your charger, including the necessary breaker, wiring, and outlet.

4

Charge at home

Once your charger is installed, you can look forward to home charging that is quick, convenient, and affordable.

Eligibility

- Be an existing residential customer in Virginia
- Own a free-standing single-family home
- Have capacity in your electrical panel to support required upgrades
- Select a charging location that is within a reasonable distance from your main electrical panel with a clear path between
- Install a Dominion Energy approved charger, included as part of this program

One Stop Shop

Ditch the stress and let us handle each step of the installation process.

Convenient Payment

Pay for your charger through monthly on-bill payments of about \$40 for five years.

Maintenance & Support

We will provide ongoing maintenance and support, including a five year warranty for your charger.
