1. The historical figures reflect the actual resource mix of electricity delivered to Dominion Energy Green Power customers in 2020. The prospective figures reflect the renewables that we are contracted to provide for 2021. Actual 2021 figures may vary from the prospective 2021 figures according to resource availability. We will report the actual 2021 resource mix of the electricity you purchased in the form of the Historical Product Content Label before August 1, 2022.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product may include generation from a facility that is approved under a strict set of criteria as repowered or a facility that is approved for extended use by Green-e[®] Energy.

For comparison, the 2020 average mix of resources supplying Dominion Energy Virginia included: Natural Gas (48%), Nuclear (32%), Coal (10%), Pumped Storage (2%), Solar (2%), Hydro (1%), Biomass (1%), Other (4%) [Dominion Energy Virginia, 2020 data].

The typical Dominion Energy Virginia customer uses 1,000 kWh per month [Dominion Energy Virginia, 2020 data].
