

Facts about Dominion Energy Green Power® Renewable Energy Certificates (RECs)

**Green Power
RECs** | **Dominion Energy
RPS RECs**

1. Dominion Energy Green Power RECs are separate from Dominion Energy RPS RECs and are purchased from different renewable facilities.
2.  The renewable facilities supported by Dominion Energy Green Power are not Dominion Energy-owned facilities.
3.  Dominion Energy does not profit from this program.

↑15%
2025

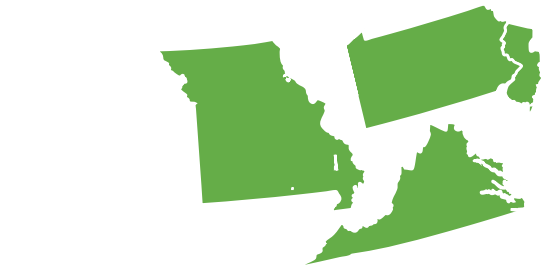

4. The renewable energy supported through this program is above and beyond Dominion Energy's commitment to Virginia's voluntary goal of 15% of electricity from renewable sources by 2025.
5.  Dominion Energy Green Power RECs come from wind, solar and biomass facilities in the mid-Atlantic and Southeastern regions.*
6.  Dominion Energy Green Power program purchases RECs from renewable facilities in Virginia whenever feasible. The percentage of RECs purchased in Virginia is directly dependent on supply.

*Sourced from PJM and SERC regions, which power Virginia.

Facts about Dominion Energy Green Power Renewable Energy Certificates (RECs)

| Renewable Resource | Projected 2014 mix | Location |
|--------------------|--------------------|--|
| Wind | 78% | VA, NJ, DE, NC, DC, PA, WV, KY, TN, SC, GA, MS, AL, LA, AR, OH, IN, IL, MD |
| Biomass | 21% | |
| Solar | 1% | |

7. In 2014, Dominion Energy Green Power will purchase RECs from renewable energy facilities in Virginia and across the mid-Atlantic and Southeastern regions.

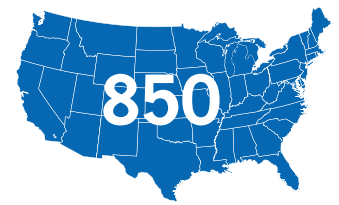

9. In 2013, Dominion Energy Green Power purchased 77.2% wind, 22.5% biomass, and 0.3% solar from Virginia, Pennsylvania, New Jersey, and Missouri.

8. The Dominion Energy Green Power program is certified by Green-e® Energy; a non-profit, third-party organization which ensures product quality and customer protection. Green-e standards require that the RECs purchased through Dominion Energy Green Power are from new renewable facilities and that they are only used once, then retired. You can learn more about Green-e at green-e.org.

10. The purchase of RECs encourages the production and growth of renewable energy in our region.

11. There are more than 850 voluntary green pricing programs like Dominion Energy Green Power offered by utilities across the country.

A list of facilities from which Dominion Energy Green Power has purchased RECs is available on request.
