

Your Connection to Green Power,
Sustainability, and Renewable Energy

SPRING 2022

We are now emission free!

Thank you for being part of a community of over 33,000 Dominion Energy Green Power® participants committed to renewable energy. We have exciting news to share about the program.

We've listened to our customers, and made a big change to our renewable energy mix for the Green Power program. We are now biomass free! This means your participation will be 100% emission free, through the purchase of Renewable Energy Certificates (RECs) from wind and solar facilities in Virginia and the surrounding region. The purchase of these RECs helps to support future growth of new clean energy projects.

Because the Dominion Energy Green Power® program is Green-e® Energy certified, sustainability-minded customers like you can be confident you are supporting renewable energy that meets or exceeds environmental standards.

See the chart below for the expected resource mix for 2022. Learn more about Green-e® Energy at www.green-e.org.

Price Decrease

Effective January 1, 2022, the cost of the Green Power program decreased from 1.3 cents (\$0.013) per kilowatt-hour (kWh) to 1.2 cents (\$0.012) per kilowatt-hour (kWh). If you're enrolled in the Block Option, the price of the block will remain at \$2, and every block you purchase will have an even bigger impact, supporting over 150 more kilowatt-hours of renewable energy per year.

If you're enrolled in the 100% Option, you can expect to pay less per month. For example, if you use 1,000 kWh per month, you'll pay \$1 less per month to participate.

If you have questions or would like to change your Green Power enrollment level, visit dominionenergy.com/VaGreenPower or email greenpower@dominionenergy.com

It's time to celebrate!

The National Renewable Energy Lab (NREL) ranked Dominion Energy's Green Power in the Top Five Utility Green Power Programs in the country! This achievement could not have been possible without your strong commitment to supporting renewable energy. Thank you!

2022 Prospective Product Content Label¹

Dominion Energy Green Power is sold in blocks of 167 kilowatt-hours (Block Option) or matches 100% of your electricity usage (100% Option).

This table provides the 2022 prospective renewable resource mix in Dominion Energy Green Power.

Similar to how nutrition labels tell us what's inside our food, Product Content Labels describe what's in our energy.

Green-e® Energy certified New Renewables² in Dominion Energy Green Power 2022

	Wind	40%
	Solar	60%

Generation Location

Wind: DE, DC, IL, IN, MO, MD, NJ, OH, PA, VA, or WV

Solar: AL, AR, DE, GA, IL, IN, KY, LA, MS, NC, OH, SC, TN, VA, or WV

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product may include generation from a facility that is approved under a strict set of criteria as repowered or a facility that is approved for extended use by Green-e® Energy.

For comparison, the 2021 average mix of resources supplying Dominion Energy Virginia included: Coal (9.7%), Nuclear (29.3%), Gas (40.1%), Oil (.2%), Hydro (.8%), Solar (2.5%), Biomass (1.4%), Pump Storage (2.0%), PJM Resources (14.0%) [Dominion Energy Virginia, 2021 data].

The typical Dominion Energy Virginia customer uses 1,000 kWh per month [Source: Dominion Energy Virginia, 2021 Data].

For specific information about this product, please contact Dominion Energy Green Power at 1-888-366-8280, email greenpower@dominionenergy.com or visit DominionEnergy.com/VaGreenPower.

Dominion Energy Green Power is Green-e® Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.
